Fog	Fog	Light rain showers	Sunny intervals	Sunny intervals	Partly cloudy (night)
Precipitation probability					
40%	40%	40%	20%	10%	10%

Forecast for Monday 27 May 2024

Weather: Widespread low cloud with outbreaks of rain or drizzle, mainly on western slopes through the early morning. The best of any cloud breaks being to the east of the park. Cloud starting to widely lift and break into the afternoon, leading to sunny spells and isolated showers. Showers are anticipated to be notably lighter compared to Sunday and gradually subsiding through the afternoon. Rather breezy at height during the day.

Chance of cloud-free hill tops above 800m: 20% at first in the west, 40% in east. Increasing to 80% by early afternoon.

Low Cloud and visibility: Extensive cloud to around 400-500m in the morning with patches below this. Cloud more broken in the east. Cloud lifting during the day, clearing most hills, but still locally covering higher summits in any showers during the afternoon. Good visibility, falling moderate or poor in rain, drizzle or showers and very poor in cloud throughout the morning.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Some good sunny spells through the day, but waterproofs still required for when showers arrive. UV levels becoming High this afternoon, so sunscreen is necessary.

Forecast for Tuesday 28 May 2024

Weather: Cloud building through the small hours of Tuesday morning with outbreaks of occasionally heavy rain soon arriving early daytime. Rain becoming more generally light and drizzly through the afternoon, but remaining mostly cloudy, with any breaks that to develop occurring mainly in the east. Local heavy rain is possible by late afternoon with a chance of isolated thunderstorms.

Maximum wind: Southwesterly 25 mph, with gusts of 30-35mph.

Chance of cloud-free hill tops above 800m: 60% at first, quickly deteriorating to 10%. Increasing to 30% during the afternoon in the east.

Low Cloud and visibility: Cloud becoming extensive and lowering to 300-500m during the morning. Perhaps as low as 200m on western slopes. Cloud breaking up a little in the east during the afternoon, but remaining persistent in the west. Visibility good, falling to moderate in any outbreaks of rain and becoming very poor in low cloud.

Temperature: **Valleys:** Plus 3 Celsius rising to plus 8 Celsius
At 800m: Plus 9 Celsius rising to Plus 14 Celsius
Freezing level: Above all summits
